

This Lab is mine!

I come here sharp at nine
I clean my desk and make it decent and fine.
I uncover my weapons, the tools and the spec.
The mails are read and responded or I pick up the phone to speak.

The day begins with haste and hey
Colleagues get ready to start the day.
I take the pleasure of finishing the estimates of samples and all
And we are ready to implement each of the QA or the QC's call.

I built the lab with diligence and care
The leadership of my boss is impartial and fair
This lab is mine as I spent all my time to build and to make it functional
Though I am not the owner nor my claim shall in anyway be ethical or legal!
